MUMBAIMUN'25

Letter from the Executive Board

Dear International Press Members,

It is with immense pride that we welcome you all to the International Press Committee of Mumbai MUN 2025. This committee echoes the power of the press and gives the conference an enthralling burst of spontaneity.

In the world today, the power that news agencies and other mass media exercise is tremendous. Since with great power comes great responsibility, we encourage each and every one of you to exercise the voice that you have been given, not with restraint but with integrity; not with caution but with sensitivity; and lastly, not with presumptions but with an open mind.

An ideal reporter requires more research and presence of mind than an international delegation. The entire image of a press delegation without adequate research is flawed. Thorough research and background knowledge of all the committees is expected from all the reporters. Deadlines, hard work, flared tempers and running around will be plentiful, but the memories you create, the new people you meet and the knowledge you gain will outweigh them all.

This study guide gives you a gist of your roles and responsibilities for the conference. Please go through each section carefully and in case of any queries, feel free to contact us.

Regards

Sanya Deshmukh

Head of IPC

Contact: sanya1213@gmail.com

Letter from the Executive Board

It is with great excitement that I welcome you to MUMBAI MUN 2025. As a photojournalist and a member of the Executive Board, I am thrilled to be part of this incredible journey where stories of diplomacy, collaboration, and innovation come to life.

For me, photojournalism is more than just documenting events; it's about capturing the moments that define experiences, the emotions that drive decisions, and the stories that connect us all. Through my lens, I aim to showcase not only the debates and resolutions you will craft but also the candid moments of passion, perseverance, and growth that truly reflect the spirit of this event.

I am especially excited about the photo walk, a chance for us to step away from formalities and immerse ourselves in the surroundings. It's an opportunity to explore creativity, share perspectives, and create visual narratives that highlight the essence of this conference. Whether you're an experienced photographer or simply someone who loves to capture moments, I encourage you to join and bring your unique perspective to the table.

Throughout this event, I'll be here to support and guide you, sharing insights and encouraging you to view the world through a storytelling lens. I hope that together we can create a visual legacy that complements this event and inspires others for years to come.

As you step into your roles as delegates, I urge you to also embrace the role of storytellers. Let your words, ideas, and photographs become powerful tools to celebrate diversity, innovation, and unity.

I look forward to working alongside each of you, documenting your journey, and creating something truly unforgettable together.

With excitement and anticipation,

M Prabhu Shankar

[Photographer-in-Chief]

JOURNALISM

RESEARCH METHODOLOGY

Follow a systematic and step-wise methodology to optimise your research and deliver it effectively:

1. Break down every word of the agenda yourself and make a note of concepts that you think are pertinent to them.
2. Read the background guide. Please note that just as the background guide is a basic tool for delegates, it is merely one aspect of your research.
3. Develop a literal understanding of the agenda.
4. Study the political, legal, social and economic aspects of the agenda. Go through articles, research papers or any relevant documents.
5. Read about the foreign policy and agenda perspective of nations that you might think will majorly impact the debate.
6. A thorough knowledge and understanding of contemporary events is a must. This ensures that your articles stay relevant.

Remember, your research accounts for more than 50% of all your written reports; do not simply rely on committee proceedings to draft a well-informed report. Research about each committee thoroughly, and it is highly encouraged for you to form your own opinions about certain aspects as you do so.

ROLES AND REPORTING

Roles of IP reporters

Committee Reports

The bulk of writing throughout the conference will consist of drafting a committee report for each day of the MUN, which will include a brief account of the debates, caucuses, resolutions, and other committee proceedings observed by the reporters, backed by their own research.

The Committee Report should have a catchy title and byline. Irrelevant details should be omitted, and maintaining a streamlined flow of events in the report is of absolute importance.

Word Limit: 400-450 words
Report Count: 2 (one for each day of the conference)

Editorials and Op-Eds

Reporters may write Op-Eds after they have finished reporting from the council, which may include their take on the agenda, or any niche topic pertaining to the agenda. Op-Eds do not have to contain any information on what happened in the council/committee but concerns what the author thinks of the discussion at hand. Op-Eds have to be very high in standards of writing and expression. In clear words, Op-Eds differ from the Committee Report in matters of substance than events. Op-Eds are **not mandatory** but they definitely add up in the marking scheme.

Word Limit: 200 words/ 600 words
Report Count: Opted by Reporter

Interviews

An interview is an opportunity of a personal interaction with a delegate or EB member. It is an effective tool which should be utilized to bring out those aspects which will not come in light otherwise in the course of the MUN. Interview questions have to be crisp and relevant to the conference and committee, but some banter is allowed.

Reporters are allowed to record the interviewee's answers using mobile devices, which they will later transcribe and add to the Interview Report.

Reporters must make the interviewee aware that the conversation is on record before the start of the interview.

The Interview Report should contain the interviewee's name, designation, and other relevant details before the questionnaire.

Word Limit: 5-10 questions with transcribed answers.
Report Count: 1-2

Press Conference

The basic ingredient of the press conference is research. You will be allowed to ask 4-5 delegates of your committee polite subsidiary questions on the second day of the conference, with the prior permission of your Executive Board. You will be trained and guided by your IP Head for the press conference in the briefing. However, the opportunity to conduct a press conference will be subjected to the time constraints that the organizers have. Their permission and word will be deemed final.

The questions for the press conference must be approved by the IP Head, who must be called to committee when the press conference is to take place.

Tweets

Witty one-liners and catchy headlines from committee proceedings will make their way to social media pages for the IPC of MumbaiMUN 2024. Tweets do not have a marking scheme but are highly recommended.

STYLE GUIDE

All the reports must follow Associated Press (AP) style of report writing. A brief overview of the same is given below.

Abbreviating Words

These are the rules for common abbreviations following AP style:

- **Use only the most commonly recognized abbreviations:** The most common- such as NASA, FBI, and CIA—can be used on all references. Less well-known, but still common ones—such as OSHA and NATO—can be used after you spell out the full name on the first mention. In most cases, however, the stylebook suggests using a generic reference such as "the agency" or "the alliance" for all references after the first.
- **Don't put unfamiliar abbreviations in parentheses after the first reference:** "The American Copy Editors Society (ACES), for example, would either be repeated as the full name on subsequent references or replaced by a generic reference, such as "the society."
- **Use an apostrophe and spell out academic degrees:** "She holds a bachelor's degree." Use abbreviations for degrees only when you need to include a list of credentials after a name and set them off with commas: "Peter White, LL.D., Ph.D., was the keynote speaker."
- **Abbreviate junior or senior directly after a name, with no comma to set it off:** "Justin Wilson Jr."
- **Spell out the names of all states when used alone:** "He lives in Montana." Abbreviate state names of seven or more letters when used with a city name, with commas before and after the abbreviation: "Pittsburgh, Pa., is a great weekend getaway spot for people who live in Youngstown, Ohio."
- **Spell out the name of a month when it is used without a specific date:** "August is too hot for a visit to Florida." Abbreviate months with six or more

letters if they are used with a specific date such as "Sept. 28." Always spell out those with five or fewer letters: "May 15."

- **Spell out titles used alone:** "She was the first female senator from her state." Abbreviate and capitalize most titles when they are used directly before a name: "Sen. Boxer posed hard questions for Rice." To determine if a title is abbreviated, look for an entry for it in the AP Stylebook or check the listing under *Titles*.
- **Spell out titles with names used in direct quotes:** The exceptions are Dr., Mr., and Mrs. "Governor Pawlenty is obviously no Jesse Ventura," she said.
- **Spell out all generic parts of street names (avenue, north, road) when no specific address is given:** "The festival will be held on South Charles Street." When a number is used, abbreviate avenue (Ave.), boulevard (Blvd.), street (St.), and directional parts of street names: "The suspect was identified as Michael Shawn of 1512 N. Mission St."
- **In writing news stories, never abbreviate**:
    - The days of the week
    - Percent as %
    - The word "and," unless the symbol & is an official part of a name

Capitalization

The AP Stylebook uses what's known as downstyle—that is, words are lowercased unless a rule says to capitalize them. If you can't find a rule for capitalizing a word in the stylebook, use it in lowercase. The most familiar capitalization rules are:

- **Capitalize common nouns such as party, river, and street when they are part of a proper name for a place, person or thing:** For example, the Libertarian Party, the Ohio River. But lowercase these common nouns when they stand alone or in subsequent references: "The party did not have a candidate for president," "She nearly drowned in the river." Lowercase all plural uses of common nouns: the Libertarian and Green parties, the Monongahela and Ohio rivers.
- **Lowercase the names of the seasons unless they are used in a proper name:** the Summer Olympics.
- **Capitalize the word "room" only when used with the number of the room or when part of the name of a specially designated room:** *Room 315, the Lincoln Room*.
- **Lowercase directional indicators:** The exception is when they refer to specific geographic regions or popularized names for those regions. For example, "the Northeast" or "the Midwest."
- **Lowercase formal titles that appear on their own or follow a name:** In the latter case, they should be set off by commas. Capitalize formal titles that come directly before a name: "The students were delighted when they heard they would meet President Obama." Never capitalize job descriptions: shortstop, police officer, attorney, and so on.

Numbers

The AP Stylebook entry for numerals is deceptively short. A close look reveals plenty of rules hiding among the cross-references. The most common are:

- **In general, spell out numbers one through nine:** Use figures for numbers 10 on up. However, there are many exceptions that always take figures. Most, but not all, involve units of measurement.

Common exceptions include:

- **Addresses:** 7 Park Place
- **Ages, but not for inanimate objects:** The 4-year-old cat, the four-year-old car
- **Cents:** 8 cents.
- **Dollars:** $3. Notice that AP style does not include a period and two zeroes when referring to an even dollar figure
- **Dates:** March 4. Notice that dates take cardinal numbers, not ordinal numbers (don't use 4th)
- **Dimensions:** 5 foot 2, 5-by-9 cell
- **Highways:** Route 7
- **Millions, billions:** 6 billion people
- **Percentages:** 1 percent. Notice that percent is one word.
- **Speed:** 8 mph.
- **Temperatures:** 2 degrees.
- **Times:** 4 p.m. Notice that AP style does not include a colon and two zeroes when referring to an even hour.
- **Spell out numbers used at the beginning of a sentence:** "Ten thousand people marched on the capital." Exception: Never spell out years: "1999 was a terrible year for technology companies."
- **Use commas to set off each group of three digits in numerals higher than 999.** Exception is for years and addresses: "12,650."
- **Use decimals (up to two places) for amounts in the millions and billions:** Do this if no precise figure is required: "$3.74 billion."
- **Add an "s" but no apostrophe to a number to make it plural:** "She kept rolling 7s." The same rule applies to decades: the 1980s. Use an apostrophe on a decade only if cutting off the initial figures: the '80s.

Punctuation and Miscellaneous

For the most part, AP style follows the same rules of punctuation taught in grade school. However, there are some important exceptions:

- **Don't use a comma before a conjunction in a simple series.** A simple series is defined as one in which no elements contain the words *and* or *or*: "The dinner choices were chicken, cod or beef." Use a comma for series that include elements containing *and* or *or*: "The menu offered a choice of bacon and eggs, pancakes, or waffles."
- **Use a semicolon to clarify a series that includes a number of commas:** Include a semicolon before the conjunction. "Parts for the carrier are made in Tampa, Fla.; Austin, Texas; and Baton Rouge, La."

Other Common Style Rules

Here are some more AP style guidelines to follow:

- **Use a person's full name on the first reference:** On subsequent references, use only his or her last name with no title. Second and following references to a married couple should refer to them as Mr. and Mrs.: "Mr. and Mrs. Oakes will honeymoon in Las Vegas." In stories in which two people share the last name, use full names on each reference.
- **Time:** Express as a figure followed by *a.m.* or *p.m.* "8:33 p.m." You do not have to add other words (e.g., night, morning, and so on) to distinguish between day and night. Use "noon" or "midnight" rather than 12 p.m. or 12 a.m.
- **Use hyphens to link all the words in a compound adjective:** "The five-volume report called for cleaning up the area over a 10-year period." Do not use a hyphen if the construction includes

"very" or an adverb ending in "–ly": "a very big project, barely legal procedures."

- **To form a plural of a single letter, use "s" and an apostrophe:** "All the B's lined up to the right." To form a plural of multiple letters, add "s" with no apostrophe: "She mastered her ABCs in little time."
- **To form the plural of words made out of a group of letters, add the letter "s":** CDs, ABCs, TVs.
- **Titles:** Books, movies, recordings, television shows, and similar works are set off in quotation marks, with all principal words capitalized: "Harry Potter and the Deathly Hallows," "Letters from Iwo Jima," "Memory Almost Full," "Grey's Anatomy." Titles of magazines, newspapers and reference works get no special treatment: Newsweek, The Boston Globe, The Associated Press Stylebook.

For the detailed AP format, visit *https://www.apstylebook.com/*

SUBMISSION GUIDELINES

- Submissions must be **on time.** Marks will be deducted for turning in the reports later than the decided time.
- Committee report for Day 1 and Day 2 must be submitted by the end of the last committee session of the day. Committee report for Day 3 must be submitted by the second last committee session of the day.
- Editorials may be submitted to the reporters' convenience, before the end of the last committee session of the conference.
- Interview Reports must be submitted as per the IP Head's discretion.
- All typed reports must be emailed to *sanya1213@gmail.com* with correct headings and subject lines.
- All written reports (if any) must be handed to the IP Head physically.

CODE OF CONDUCT

- All reports should be neat, with a uniform font type and size maintained throughout. The font specifics should be formal and easy on the eyes.
- **Complete plagiarism of reports will not be tolerated.** While paraphrasing lines and quotes from different sources is a reporter's tool, plagiarism checks will be enforced to ensure authenticity of the entire report. This is applicable for the Committee Report as well as Op-Eds.
- Decent etiquette is to be maintained while interacting with members of the Executive Board, Organising Committee, delegates, and other people present in the conference.
- While in committee, maintain strict decorum. Do not move around or cause disturbance during formal committee sessions. Reporters are allowed to lobby during informal sessions.
- Press conferences tend to get spirited, but reporters are urged to maintain a calm demeanour and respectfully put forth their questions.
- **Use of derogatory remarks or colloquial language will result in mark deduction or disqualification from the International Press**, according to the IP Head's discretion.
- A positive and polite tone of voice is to be maintained in the Interviews and otherwise, throughout the conference.
- Following the formal dress code is applicable to the IP members as well.
- **The IP Head is not responsible for the misbehaviour of any of the IP Members.**

PHOTOGRAPHY

CAMERA BASICS FOR BEGINNERS

What is the Exposure Triangle?

Aperture, shutter speed, and ISO—otherwise known as the "Exposure Triangle"— are a trio of camera functions that are responsible for the exposure (the level of light and dark tones) in your image.

These three functions play a large role in the overall look and effect of your image, and mastering their use is essential to becoming a better photographer, especially when shooting in manual mode.

The exposure triangle consists of three fundamentals that can be controlled to get the expected exposure. These three fundamentals are;

Aperture

This is the opening in the lens that allows light to reach the sensor. The wider the opening, the lighter that enters. The size of the aperture is measured in focal stops or "f-stops," and is based on the diameter of the hole through which light enters the camera. The smaller the hole, the higher the f-stop number, and consequently, the darker the image.

Aside from controlling the brightness of the photo, an aperture is also used to determine the depth of field. Wide Aperture (Low f-stop number): If you want an image where the subject is in sharp focus but the surrounding area is blurred, you'll need a wide aperture or a low f-stop number. This is best for photography where you want the subject to stand out, such as portrait, wildlife, or sports photography.

Smaller Aperture (High f-stop number): Conversely, if you want more of the area around the subject to be brought to focus, you'll need to shoot with a smaller aperture or a higher f-stop number, which will expand the depth of field. This is best for photography where you want to focus on backgrounds, such as landscape and nature photography.

Shutter Speed

Shutter Speed is the speed with which the camera's shutter opens and closes. Fast shutter speeds allow photographers to freeze motion while a slower shutter speed is used to blur motion. The former is helpful for situations where you want the subject to be captured perfectly mid-motion, while the latter is great for capturing the motion itself, such as the look of a speeding train, or the gradual shift of stars in the sky.

Shutter Speed- Avoiding Unwanted Blur: A tripod or stabilizer may be necessary to maintain a sharp image below a certain shutter speed Especially if you have shaky hands, camera movement—no matter how minimal—can cause the image to blur Unless your lens has built-in stabilization, the minimum setting for keeping your handheld photos sharp varies depending on the focal length of your lens. In short, the larger the focal length, the greater the risk of camera shake.

ISO

Lastly, the final side of the triangle is the ISO. This is what affects the sensitivity of the sensor to light. Generally, a higher ISO is used during low-light situations, allowing the sensor to absorb as much of the available light as possible. On the flip side, in order to avoid overexposure, a lower ISO is used when photographing scenes with lots of light. One thing to be wary of—especially when shooting in low-light situations—is that higher ISOs can result in a noisy image. What we mean by "noise" is a speckled, grainy appearance on your photo. Unless grainy is the look you're going for, noise reduces the quality of the photo. As such, it's best to keep your ISO as low as possible to keep your

image sharp and crisp. If that's not possible, one solution could be to use accessories that create artificial light in low-light scenes, such as flash.

Managing Exposure

As with all things, balance is necessary when fiddling with the exposure settings. OVEREXPOSURE can result in an image that is washed out or overly bright. UNDEREXPOSURE can result in a dark photo with a lack of detail.

The best level of exposure is one in which the image looks natural, with a balance of both light and dark areas. Most digital cameras come with the following tools to help you manage your exposure; Exposure or Light Meter, Exposure Compensation and Histogram.

BASIC COMPOSITION RULES

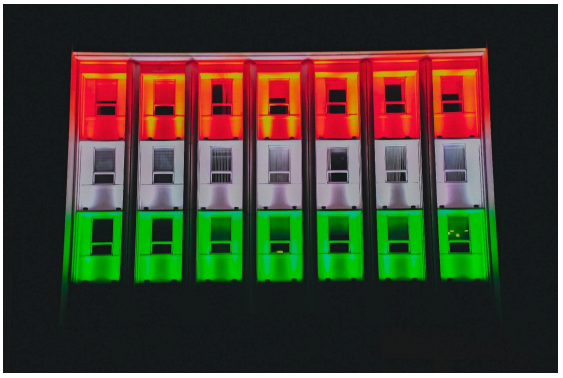

What is composition in photography?

As in visual arts, composition in photography is simply the arrangement of visual elements within a frame. The term composition means 'putting together'. So, to get the perfect shot, the photographer has to organize all the objects in a scene.

Basic elements of composition in photography

To enrich images and make them more visually appealing, photographers utilize a variety of compositional elements. Patterns, textures, lines, shapes, forms, colour, tone, contrast, depth, frames, symmetry, asymmetry, depth of field, viewpoint, negative space, positive space, and visual tension are among them. Read on to learn about the five basic elements of composition in photography.

1. Shape is a two-dimensional compositional element of photography that can define a subject or a structure. It can be organic, like a person, animal, plant, or geometric, like a square, circle, or triangle. When different shapes intersect and overlap, they can unite to create a new shape. They can also surround an area, forming another shape.

2. Form is created when the shape becomes three-dimensional. This can be done by adding depth to a photo through lighting and perspective. Thus, when the shape and shadows collide, we see touchable contours brought out by the tonal range.

3. Texture is a compositional element of photography that adds another layer of depth to an image, making it more real and perceptible.

The texture itself can be the subject of a photo, such as an ice surface or patterns on leaves. Alternatively, texture can be part of the composition, adding dimension and weight to your image and giving it a sense of reality.

4. Colour is characterized by hue, saturation, and luminance. Each variable can influence not only the composition of a photograph but also its mood. By experimenting with various colours in the frame, you can put visual weight on a specific part of the image. Black and white photography can help show contrast, highlight emotions, or emphasize key visual elements in your photographs.

5. Positive and negative space. The scale and arrangement of the elements and objects in the frame affect the viewer's perception of the picture. By effectively using space in your photographs, you can convey a certain mood or draw the viewer's eye to an interesting or significant part of the image. Positive space refers to the subject or areas.

Rules of Composition

Leading Lines

Leading lines help lead the viewer through the image and focus attention on important elements. Anything from paths, walls, or patterns can be used as leading lines. You'll also notice that I used a centered composition for this scene. The symmetry of my surroundings made this type of composition work well

Patterns and Textures

Human beings are naturally attracted to patterns. They are visually attractive and suggest harmony. Patterns can be man-made like a series of arches or natural like the petals on a flower. Incorporating patterns into your photographs is always a good way to create a pleasing composition. Less regular textures can also be very pleasing to the eye.

Rule of Space

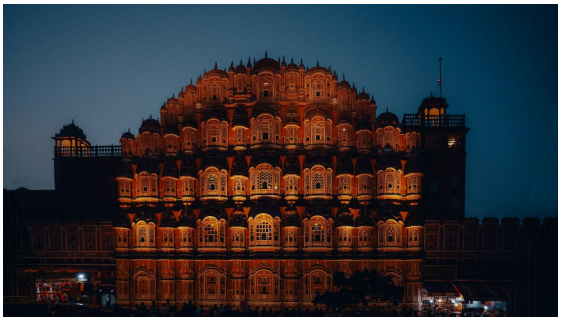

The rule of space relates to the direction the subject(s) in your photo is facing or moving towards. If you are taking a photo of a moving car, for example, there should be more space left in the frame in front of the car than behind it. This implies that there is space in the frame for the car to move into. Take a look at the example below

Symmetry

Symmetrical composition is where the frame is split into two either horizontally or vertically and has a subject(s) of equal weight in both portions of the frame.

Rule of Thirds

So I've just told you that there are no hard and fast rules when it comes to composition and then the first thing I write about is the 'rule' of thirds. In my defense, I didn't come up with the name. The rule of thirds is very simple. You divide the frame into 9 equal rectangles, 3 across and 3 down as illustrated below. Many camera manufacturers have actually included the capability to display this grid in live view mode. Check your camera's manual to see how to turn on this feature.

The idea is to place the important element(s) of the scene along one or more of the lines or where the lines intersect. We have a natural tendency to want to place the main subject in the middle. Placing it off-center using the rule of thirds will more often than not lead to a more attractive composition.

TYPES OF ASSIGNMENTS

This particular simulation will aim to fulfil two aspects:

Committee photos - Committee photos are general photos of the committee proceedings that will be covered throughout the day. Photographers are expected to maintain a certain standard for these pictures and only minimal editing is allowed. Extreme photo manipulation for this assignment is strictly prohibited.

Creative assignments - several creative assignments will be assigned by the executive board which will aim to produce creative and strong photographs. All levels of editing are allowed for these submissions. For better understanding, a tentative list of creative assignments is mentioned below:

All these assignments are just examples of types of assignments that would be included. Except for coverage and a few creative assignments, all other assignments have full editing liberty (since sometimes these editing skills portray the best stories). The assignments will be picked according to the time constraint, lighting of the venue and several other factors. The Executive Board is delighted to announce that, for this simulation of international press; assignments for the photojournalists will be mentioned in this style guide. This is done to encourage healthy and fair competition. However, please note that it's in the EB's discretion to make any changes if necessary. And the deadline details will be discussed during the conference.

Coverage

30 pictures each day.

Coverage Assignment: Capturing the Heart of the Committee

In the 'Coverage' assignment, we challenge you to become the eyes and soul of your committee, seizing the heart of its proceedings. Your task is to click pictures that do more than just document; they tell a compelling visual story.

How to Excel

Capture the Mood: Your lens should be the emotional barometer of the committee. Convey the spirit, energy, and ambiance of the event. Your photos should speak volumes about the atmosphere.

Exploring New Techniques: Don't hesitate to experiment with framing, composition, and photography techniques. Push the boundaries of your craft to create compelling and unique visuals.

Emotion is Key: Every image should be a vessel for emotion. Whether it's passion, engagement, enthusiasm, or any other sentiment, ensure your photos express the feelings in the room.

Submit the Effort: Remember, it's not just about the number of photos; it's the effort, creativity, and story behind each click that matters most.

'Coverage' is your chance to be the visual chronicler of your committee's journey. Your photos will not just capture the moment; they will immortalize the essence of the experience.

Editing Criteria

Only minimal editing is allowed. Minimal editing in photography refers to making only subtle and essential adjustments to a photograph after it has been taken. The goal of minimal editing is to enhance the image without fundamentally altering its content or character. This approach is often preferred in certain types of photography, such as photojournalism and documentary photography, where authenticity and accuracy are highly valued.

Minimal editing typically includes:

Basic Adjustments: This involves adjusting fundamental parameters such as

exposure, contrast, brightness, and colour balance. These adjustments help ensure that the image accurately represents the scene as it appeared when it was photographed.

Cropping: Minimal cropping may be performed to improve the composition and remove distracting elements, but it is done without significantly changing the image's content.

Straightening and Alignment: Minor straightening or levelling adjustments can be made to correct for any unintentional tilting or distortion in the image.

White Balance: Ensuring that the colours in the image appear natural and accurate is part of minimal editing. This adjustment helps maintain the authenticity of the scene.

Basic Retouching: Minimal editing may involve retouching to remove minor blemishes or distractions that are not integral to the scene, such as dust spots, lens flares, or minor imperfections. Minimal editing differs from more extensive post-processing, such as heavy retouching, creative filters, compositing, or special effects. The intent is to preserve the integrity and truthfulness of the original scene.

PRESEVE THE AUTHENTICITY OF THE PICTURE.

Creative Assignments

Creative Assignments are designed to immerse you in the role of a photojournalist, where creativity is your compass and critical thinking your guide.

What to Expect

These assignments are curated to test not just your photography skills, but your ability to think critically and your awareness of the world around you. They're designed to be challenging, but they offer the opportunity to evolve and grow as a visual storyteller.

Embrace the Challenge

You'll need to get creative, delve into research, brainstorm ideas, observe keenly, and tap into your social awareness. Your camera will be your tool, and research your weapon.

These assignments will push you to your creative limits, all while providing a taste of what it's like to be a photojournalist. So, let's rise to the challenge and capture the stories that matter. Creative assignments for this simulation are mentioned below.

Editing Criteria

No editing limitations.

WHAT IS PHOTOJOURNALISM?

Photojournalism is a form of journalism that tells a news story through powerful photography. Photojournalism began with the first pictures of war published in newspapers during the Crimean War and the American Civil War. However, even at this time, the image was only there to enhance the text, not lead the story. It wasn't until the development of the smaller, lighter 35mm cameras and flashbulbs of the 1920s that a 'Golden Age' of Photojournalism took hold. The likes of Cartier-Bresson presented candid images of their life and times.

The rise of the photo essay and the magazines Life, Vu, and Picture Post responded to the greater demand for images of news stories and allowed photojournalism to blossom. Better inks and papers for magazines meant full-page image spreads, allowing the image to tell the story, rather than the small engravings in the newspapers of previous decades. This simulation will help you understand the nuances of photojournalism.

Photo Walk

A **Photo walk** is a unique and enriching experience that combines exploration, observation, and storytelling through photography. Photojournalists, especially those from events like conferences, summits, or cultural exchanges, view a photo walk as an opportunity to document their experiences while fostering creativity and collaboration.

1. **Cultural Immersion:** A photo walk allows delegates to immerse themselves in the local culture, capturing the essence of the destination's people, architecture, and traditions.

2. **Networking Opportunity:** It provides a relaxed environment for Photojournalists to interact with fellow photojournalists, exchange ideas and build professional or personal connections.

3. **Learning Through Observation:** Delegates can observe how others approach photography, gaining insights into different perspectives and techniques.

4. **Stress Relief:** Amidst formal sessions and schedules, a photo walk is a refreshing break, helping delegates unwind and rejuvenate.

5. **Memorable Documentation:** By participating, Photojournalists create a visual diary of their journey, preserving memories of their time and the connections made.

6. **Creative Expression:** For those passionate about photography, it's a platform to express creativity and tell stories through their lens.

7. **Knowledge Sharing:** Photojournalists can exchange tips and experiences, enriching their understanding of photography and storytelling.

A photo walk for delegates transforms the event experience into a deeper, more personal narrative, allowing them to connect with the location and its essence while fostering camaraderie among peers.

What To Expect From This Simulation?

- All participants can expect to learn and understand the following from the simulation:
- Basics of photojournalism
- Basics of candid photography
- Deadline management
- Creative assignments covering several aspects of photography and
- photojournalism
- On-time feedback from the executive board after each submission.
- Extensive discussion/mentoring sessions on both days of the conference.
